DCart10.7 is the next step in audio processing evolution. With DCart10.7, we have added to, and enhanced the existing tools you know and love and we have made the much easier to find and use.

A new Graphical User Interface provides a very intuitive way to interact with the power of the classic Diamond Cut tools. A new set of task panes steers the user to the correct solution based on their audio goal. With 10.5 we have introduced "Green Zones" on our filters to help you quickly dial in your sliders settings. Additionally, it incorporates many new descriptive presets for the various filters. Tasks that may have been difficult to accomplish in the past are now easily approachable with new features.

New DCart 10.7 Features

Ease of Use

- Three Step Wizard to get you started with professional record restorations (Take a look at the Task Pane)
- Green Zones to guide filter slider settings
- Tasks Pane feature guides you to the correct filter
- Updated GUI Appearance
- VST Hosting (VST Plug-in Support)
- Waveform Overview for quickly getting around in a file
- Tabbed display or traditional multi window view
- Larger Â and completely configurable toolbar Icons
- One-Click Switch between Fast & Classic Edit Mode
- Improved tracking of all editing functions in classic editing mode between source and destination files
- Quick access to Spectrogram or Histogram views from the main window
- Changed the software application look to follow various flavors of Windows
- Paste Interpolate Icon button for easy waveform interpolation when working with tablet computers.
- Easy check for updates from the help menu
- Customizable Keyboard Accelerators
- Customizable Application Look
